Experience

Software Engineer | edgedVR

Mar 2025 – Present

- Leading the development of eVR Classroom, a Unity-based VR Education application with multiplatform support including Meta, PICO and DPVR via OpenXR with a WebGL build for browser-based solution and native APKs for standalone VR.
- Developed the eVR Classroom management system and landing page built in Vite with React.js, Node.js, Express.js, Azure App Service and Azure Blob Storage with CI/CD, custom domain SSL and Azure static web app hosting
- Designing both system design and ui/ux, documentation, cyber security, encryption and AI Integration between both APK and WebGL with the server via API.
- Review all Git control, pull request and commit according to the tickets.

IT Intern | Insight IT

Aug 2022 – Nov 2022

- Deployed and configured secure business applications across client systems using Ninite at Insight IT, ensuring standardised and vetted software rollouts.
 - Diagnosed and resolved complex IT issues including system crashes, blue screens, and application-level bugs, sharpening troubleshooting and root-cause analysis skills.
-

Honors and Awards

- Debate Contest, International and National English and Indonesian Debate Contest in 1st and 2nd Place
 - Pacmann Bootcamp Certificate as a Data Engineering student
-
